

# Collision Avoidance

## The Forklift Spotter™ Safe Zone

### Help prevent pedestrian collisions!

The Forklift Spotter™ Safe Zone can prevent these potentially lethal accidents. This 360° Safe Zone provides a visual alert around the entire forklift, making it immediately clear to pedestrians, the safe distance to keep from the forklift.

**The Forklift Front Spotter** creates a safer environment by emitting a bright, white light in front of the forklift. It is built strong for the rough work forklifts do.

Forklift Front Spotter

**The Forklift Side Spotters** emit a red beam to the floor, on either side of the forklift. This red glow is a visual indicator of the safe distance pedestrians should keep between themselves and the forklift.

Forklift Side Spotters

**The Forklift Rear Spotter** projects a blue beam of light onto the floor behind the forklift alerting pedestrians of the oncoming vehicle well in advance.

Forklift Rear Spotter

Component	Part Number	Weight (lbs.)
The Forklift Spotter™ Safe Zone – Complete Kit (Front, 2 Sides, Rear & 2 Universal Bracket kits)	70-1097	9 lbs.
<b>As Individual Components</b>		
The Forklift Front Spotter	70-1096	1 lb.
The Forklift Side Spotters (requires 2 for either side of the forklift)	70-1094	2 lbs.
The Forklift Rear Spotter	70-1095	2 lbs.
Universal Mounting Bracket Kit (includes 2 ties & 1 bracket)	70-1091-1	1 lb.
Forklift Spotter Magnetic Bracket (can be used with all Ideal Warehouse Innovations forklift lights)	70-1117	1 lb.
Warning Sign (Aluminum 9" x 12")	70-1095-1	1 lb.
