

Adjustable One Piece Seal (OPS)

Applications

- Fire Extinguisher Pins
- ATM Cassettes
- Healthcare

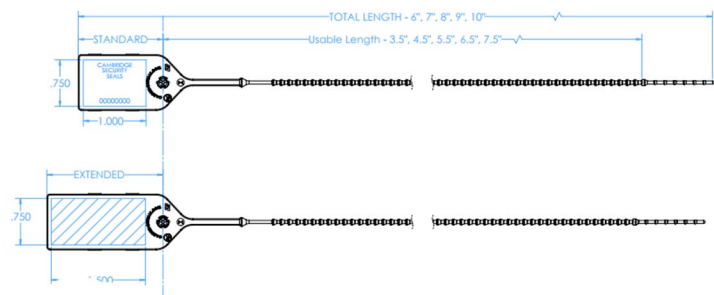

- Storage Cabinets
- Storage Totes
- Storage Boxes

- Food & Beverage
- Life Vests
- EMS

The CSS One Piece Seal is an adjustable tamper-evident seal available in five lengths: 6", 7", 8", 9", and 10". The OPS is flexible by design; engineered to bend, not break, when applying the seal, and is UL Certified for use on fire extinguishers in both the U.S. and Canada.

This seal offers increased security and reliability through a redesigned locking barrel featuring three sturdy locking teeth. A thicker flag and extended options provide a more stable platform to improve print quality and accuracy while eliminating the blushing typically seen on other seals.
