- 18-8 Stainless steel construction
- Polyurethane handle coating
- 5.5 lbs. (2.5 kg)
- 32-1/4" (819 mm) long
- Fits most modern container door handles

The HARD Way

The EASY Way

The StrongArm Trailer Lock Power Lever makes short work of stubborn container door handles that are difficult to move because of their small size and are often jammed, especially in snow and ice conditions. Just slip the tool over the door locking handles and easily use the extra leverage provided by the StrongArm to open the doors. The extra leverage reduces operator strain and can help prevent injury.

Additional safety is provided by the StrongArm's handle guard, helping to prevent scrapes and bruises.

The StrongArm can also be used as a "Tire Thumper" to check for adequate tire pressure.
