

SECUR-T

The UniFreight TS and UniFreight HD are fixed length plastic strap seals designed for freight cargo and general use.

They are produced in the brand new **Universeal** factory, located in **Montreal, Canada**.

The **TS** model features a break hole in the strap for **easy removal**.
The **HD** version has a solid strap for higher resistance (over 100 lbs).

Both models feature a resistant one-piece **Polypropylene** body and strap, with welded, tamper resistant, **Acetal** locking mechanism, with a **dual locking chamber** for higher tamper resistance.

Main applications: trailer doors, bulk tankers, railcars, tote boxes, etc.

Main features

- ★ Durable Polypropylene strap and body, with highly resistant double locking mechanism for total security
- ★ Sequentially laser printed numbering. Company name and logo are available.
- ★ Tamper-evident design. Plastic shows signs of blushing.
- ★ Default colour is yellow. Also available in blue, red, orange green and white. Special colours on request for large volume orders.
